Cooperation in Wild Chimpanzees

by

Dr. John Mitani

James N. Spuhler Collegiate Professor of Anthropology
University of Michigan

When: Wed, September 26 at 10:00am

Where: Marvin Center, Room 309

800 21st Ave NW

John Mitani is a primate behavioral ecologist whose research focuses on the primate social behavior and communication. He is involved in ongoing field research on the chimpanzees of Kibale National Park in Uganda, focusing on aspects of social organization, including kinship, territoriality, cooperation, aggression, and hunting behaviors. Throughout his career, his research has led him to study every species of ape in their natural habitats.
